GENERAL NOTES:

The Grade or Ground is defined by the straight line connecting the asphalt road level to the level of the existing dock as built by the original developer.

The height of a fence to be installed along the side boundary is to be 48" maximum above the grade line.

No structure(s) built within the canal setback area should be higher than 48" measured from the grade line.

The definition of grade as described above is in accordance with parameters set forth by the original developer.
